

The Ketch Rigged Sloop Speedwell Wood Package

These strips are mainly for planking the hull and decks and a few other aspects of the model and are enough to complete the project. However you may wish to cut your own strips from equivalent sheet stock instead. For example, instead of bending and tapering the supplied $7/32'' \times 3/64''$ strips you may wish to cut the desired plank shapeswhich are tapered and curved from a $3/64''$ thick sheet. It's a matter of what is more comfortable for you to do.

Strips included with this wood package

Alaskan Yellow Cedar strips

$7/32'' \times 1/32''$ - 14 strips

$1/4 \times 1/32$ – 12 strips
